  - MKII for 30" and smaller belts
- Able to run with belt speeds up to 24ft/sec
- Accommodating belt widths up to 2140mm (84.25")
- Modular low profile design
- Installs directly to existing belt structure
- Multiple styles, sizes, & configurations of brush elements

# SMARTBRUSH

*Not just any brush...but a SMARTBRUSH*

## OVERVIEW

The SMARTBrush\* is a belt-driven conveyor cleaning system. No external or ancillary power sources required.

Currently used in a wide variety of industries conveying: sand, cement, limestone, clinker brick, granite, animal feed, coal, coke, ash, DSG (iron silicon), gypsum, salt, glass, frit, metals, sinter, plastic granules, food service and recycling plants.

*Issues we help eliminate...*

## BENEFITS

### Automatically Adjusts:

System tension adjusts as brush element wears

### Virtually Maintenance Free:

Bearing grease and brush element change recommended when needed

### Prevents Damage and Premature Wear:

Idler rollers and bearings will not be impeded by material build up

### Cost Savings

Maintaining a clean belt will prolong service life

**Professional Installation Available**
